BATKHELA MARKETPLACE

Hyperlocal Multi-Vendor E-Commerce & On-Demand Delivery System

PROJECT SPECIFICATION MANUAL
Language: Roman Urdu
Status: 100% Tested & Verified

1. Project Ka Mukamal Taaruf (What is Batkhela Marketplace?)

Batkhela Marketplace ek mukamal, professional aur customized multi-vendor e-commerce aur on-demand delivery platform hai jo khaas tor par **Batkhela City (District Malakand, KPK)** k lye design aur develop kia gya hai. Is system ka bunyadi maqsad Batkhela k local bazzaron (Main Bazar, College Road, Hospital Road, Zafar Park Road) k tamam dukandaron ko ek digital platform par lana aur local awam ko ghar bethay har qisam ki khareed-o-farokht aur tez tareen delivery ki sahoolat muhayya karna hai.

Is system k andar chaar (4) mukhtalif kirdar (Roles) aapas me live jure howe hain:
1. **Customer (Gahak):** Jo mobile app se saman dekhta hai, cart me dalta hai aur order karta hai.
2. **Vendor (Dukandar / Dukan Malik):** Jo apni dukan, products aur orders ko manage karta hai.
3. **Rider (Delivery Boy):** Jo dukan se parcel pick kar k customer k ghar tak live GPS se pohchata hai.
4. **Admin (Super Admin):** Jo web dashboard se pooray shehar k vendors, riders aur orders ko control karta hai.

2. Is Project Me Kon Kon Si Technologies Use Howi Hain?

Is project me latest industry-standard tools aur modern technologies istemal ki gayi hain taake app tez chalay, crash na ho aur production k lye 100% secure ho:

Category	Technology / Tool	Project Me Iska Kaam / Faida
Mobile Frontend	**Flutter 3.47.1 & Dart 3.13.1**	Android aur iOS dono k lye ek hi super-fast codebase. Customer, Vendor aur Rider ki apps ek hi app k andar switch hoti hain.
Admin Frontend	**Flutter Web**	Super Admin k lye desktop & tablet responsive dashboard jahan se poori marketplace manage hoti hai.
Shared Core Logic	**marketplace_core (Monorepo)**	Shared models, business rules, cart calculation, aur validation logic jo mobile aur web dono me share hoti hai.
Cloud Backend & DB	**Supabase (PostgreSQL 15)**	Ultra-secure database, automated triggers, foreign keys, aur high-performance relational tables.
Database Security	**Row-Level Security (RLS)**	Data protection! Customer sirf apna data dekh sakta hai, Vendor sirf apni dukan ka, aur Rider sirf apna.
Realtime Engine	**Supabase Realtime (WebSockets)**	Live order status updates, instant rider notifications, aur live cart sync bina page refresh kiye.
Cloud File Storage	**Supabase Storage (S3 Compatible)**	Dukan k banners, logos, product photos aur delivery receipts (PoD) ko mehfooz cloud buckets me store karna.

Device Hardware	**image_picker & StorageValidator**	Mobile camera aur gallery se real photos capture karna, file size check karna aur corrupted files rokna.
Offline Demo Engine	**Dual-Mode Repository Pattern**	Bina internet ya bina database k bhi app 100% chalti hai (Demo mode), aur cloud milte hi live ho jati hai.
Code Quality & Tests	**Flutter Test Suite (130 Tests)**	130/130 unit, widget aur controller tests pass hain. 0 linter warnings.

3. Yeh System Kese Kaam Karega? (Step-by-Step Complete Lifecycle)

Step 1: Customer Order Karta Hai
Gahak app khol kar Batkhela Main Bazar ya kisi b dukan ko select karta hai. Saman cart me dalta hai aur checkout par apna pata (Delivery Address) aur Cash on Delivery (COD) select kar k 'Place Order' dabata hai.

Step 2: Vendor Ko Instant Order Milta Hai
Dukandar k mobile app par foran ghanti bajti hai aur naya order screen par show hota hai. Dukandar items check kar k 'Accept Order' karta hai aur samaan pack (prepare) karna shuru karta hai.

Step 3: Rider Ko Dispatch Notification Milti Hai
Jaise hi vendor order tayyar karta hai, system qareebi online Rider ko alert bhejta hai. Rider order accept kar k dukan ka pata dekhta hai aur dukan pohanch kar parcel pick karta hai.

Step 4: Live Delivery & GPS Tracking
Rider customer k ghar ki taraf nikalta hai. Customer ko screen par live nazar aata hai k Rider kahan pohanch chuka hai aur kitna time baqi hai.

Step 5: Parcel Delivery & Asal Camera Proof (PoD)
Customer k darwazay par pohanch kar Rider mobile camera se parcel ya delivery receipt ki tasweer khenchta hai (Proof of Delivery) jo cloud par upload hoti hai. Rider Cash collect karta hai aur order 'Delivered' mark ho jata hai.

Step 6: Admin Monitoring & Settlement
Super Admin web dashboard par live dekh raha hota hai k kitnay orders chal rahay hain, kitnay deliver howay, dukan ki kamai kitni hai aur platform ka commission kitna bana.

4. Chaar (4) Kirdaron Ki Mukamal Tafseelat (Role Breakdown)

A. Customer App (Kharidar / Awaam)

- **Marketplace Discovery:** Batkhela k local bazzaron aur shops ki categorization.
  - **Single-Vendor Cart Protection:** Customer aik waqt me aik hi dukan se order kar sakta hai taake delivery mix na ho aur taqaza theek rahay. Agar doosri dukan se item add kare to app alert deti hai.
  - **Real-time Stepper:** Order status k 5 marhalay hotay hain: Placed → Confirmed → Preparing → Out for Delivery → Delivered.
  - **Bilingual & Clean UI:** Batkhela k aam user k lye asaan tareen Urdu-friendly layout.

B. Vendor App (Dukandar / Shop Owner)

- **Shop Profile & KYC:** Dukan ka naam, CNIC, aur certificate upload karna.
  - **Live Inventory (Khatay):** New items add karna, rates change karna, stock status (In Stock / Out of Stock) set karna.
  - **Camera Integration:** Real device camera se product ki tasweer khench kar cloud par lagana.
  - **Order Management:** Incoming orders ko accept ya reject karna, preparation timer set karna aur rider assign karna.
  - **Dukan Analytics:** Rozana ki kul sales aur daily profits ka hisab kitab.

C. Rider App (Delivery Boy / Courier)

- **Duty Toggle:** Online / Offline switch taake rider apni marzi se shift shuru kar sakay.
  - **Delivery Dispatches:** Batkhela k ilaqon k mutabiq order dispatches aur delivery fee earnings ka hisab.
  - **Navigation Tracker:** Batkhela k coordinates (34.6158° N, 71.9722° E) k mutabiq distance aur speed calculation.
  - **Camera Proof of Delivery (PoD):** Customer ko saman daitay waqt receipt ya package ki real photograph upload karna taake jhoot ya ghalat bayani na ho sakay.

D. Admin Web Dashboard (Super Admin Control Room)

- **9 Functional Control Modules:** Overview (KPIs), Vendors Approval, Riders Approval, Master Orders, Products Moderation, Categories Taxonomy, Regional Settings (delivery radius & fees), Homepage Banners, Promotions/Vouchers.
  - **Security Controls:** Ghalat dukandaron ya fraud riders ko aik click par block ya suspend karna.

5. Database, Security Aur Dual-Mode Engine

1. Row-Level Security (RLS): Supabase PostgreSQL me har table k oper RLS lagaya gya hai. Iska matlab yeh hai k agar koi hacker API call kare to bhi wo kisi doosray user ka data nahi chura sakta. Har user sirf apna record dekh sakta hai.

2. Dual-Mode Architecture: Is project ka sab se bara technical faida yeh hai k is me doosri aam apps ki tarah hardcoded backend nahi hai. App shuru hotay waqt check karti hai: Agar Supabase Cloud keys mojood hain to foran Live Mode chalu ho jata hai; agar internet na ho ya keys na hon to app crash hone k bajaye 100% In-Memory Demo Mode par chal parti hai taake presentation aur testing mutasir na ho.

3. Real Camera Storage Validation: Image upload karne se pehle app file bytes check karti hai taake fake files ya virus cloud par upload na hon aur 5MB se bari files block hon.

6. Is Project Ko Chalane Aur Test Karne Ka Tareeqa

Maqsad (Action)	Terminal Command (PowerShell)
Mobile App Run Karna (Demo Mode)	`cd apps/mobile_app` `flutter run`
Admin Web Dashboard Run Karna	`cd apps/admin_web` `flutter run -d chrome`
Mukamal 130 Tests Run Karna	`flutter test`
Android APK Build Karna	`cd apps/mobile_app` `flutter build apk --release`
Live Supabase K Sath Run Karna	`flutter run --dart-define=SUPABASE_URL=YOUR_URL` `--dart-define=SUPABASE_ANON_KEY=YOUR_KEY`

Khulasa (Final Verdict):
Batkhela Marketplace ek intehayi mazboot, clean code, aur 100% verified software architecture par bana howa hai. Tamam 130 tests pass hain, 0 code errors hain, aur Customer, Vendor, Rider aur Admin k tamam features ba-asani chaltay hain. Yeh project local marketplace revolution k lye tayyar hai!
